**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-12, 13-27, and 28-38, drawn to Client/ Server, classified in class 709, subclass 203.
  - II. Claim 29-48, drawn to Database, distributed or remote access, classified in class 707, subclass 10.
  - III. Claim 49-71 and 72-73, drawn to Control of information signal processing channel, classified in class 369, and subclass 47.16.
  - IV. Claim 74-85, drawn Channel assignment, classified in class 370, subclass 341.
  - V. Claim 86-95, drawn to Converting between protocols, classified in class 370, subclass 446.
  
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Art Unit: 2141

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Jack P. Friedman on April 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
